

## BigQuery Account Creation and API Private Key Setup Instructions

- Go to bigquery page: <https://cloud.google.com/bigquery>
- Click on start free in the top right corner
- Either sign in or create a new account
- Add payment information - YOU WILL NOT BE CHARGED, this is only a free trial.
- Next, click the three bars in the top left corner of the screen to open a sidebar navigator. Then click on IAM from the IAM & Admin section:

- On the left, click on Service Accounts
- Click on create service account
- Create a service account

- In step 2 of creating a service account, give your new service account the Big Query - Bigquery Job user Role

- 
- A new panel will open up, with your new service account's info. Click on the three dots under actions, then "manage keys"
- Click on add key, and create a new private JSON key.
- Make sure to save this file to a location you'll remember later,, it will be used in the BigQuery Tethys App tutorial.
- You're done! :)
